SKILLS

PROGRAMMING

Languages:
Javascript • Typescript • Python • Go
Java **Technologies:**
React Native • React js • Angular •
Express • Nodejs • Go-fiber
Database:
MySQL • MongoDB • PostgreSQL

SOFT

Collaboration • Communication • Growth
Mindset • Decision Making • Problem
Solving

EDUCATION

MUMBAI UNIVERSITY

BE in Computer Engineering
Nov 2020 | Mumbai, India
College of Engineering
Pillai HOC College of Engineering and
Technology

MSBTE

Diploma in Computer
Engineering
May 2017 | Mumbai, India
College of Diploma
Vidyalankar Polytechnic

controlled surveillance Robot with
obstacle detection using Arduino.

EXPERIENCE

ONETURE | Software Engineer

Feb 2022 - Mar 2023 | Mumbai, India

- I worked under CMS, where I built and handled an application for ATM-related options.
- I build mobile and web applications that bank staff uses to generate activities of ATMs operation, which is reflected in the custodian mobile app that custodians use to access ATMs for multiple activities. More than 60k users per day use my applications.
- And after working and observing operations closely and daily calls from the custodian to cms service care, I got an idea that helped us reduce calls by 40%, it was my greatest achievement in real-life problems.
- Teaching to juniors and assigning tasks.
- Reviewed code, debugged problems, and corrected issues in existing applications.

WEBSOC | Software Engineering

Sept 2021 – Feb 2022 | Hyderabad, India

- worked on two projects Caelum is an E-commerce app for both IOS also for android devices and another Spola this one is a big app that has combined feature applications like Instagram and clubhouse.
- Reviewed code, debugged problems, and corrected issues in existing applications.
- In this company i used technologies like :-Typescript, Javascript, React-native, Next.js,Express.js React.js, Redux, Context API.

MAXELIT | Full Stack Developer

Mar 2021 – Setp 2021 | Ahmedabad, India

- Build application which is Caregiving Service request app for android and ios using React native expo.
- Reviewed code, debugged problems, and corrected issues in existing applications with react and Django.
- In this company I used technologies:- react-native, Python, Django, javascript, CSS, and HTML.

PROJECTS

BOOK MANAGEMENT SYSTEM | GO,MYSQL

- in this project, we build API for book Management where you are allowed for curd operation

MERN-STACK MEMORIES POST | react.js, redux-thunk, Express.js, heroku, netlify

- I built this application where anyone can register themself by filling out a form or by using google, and after that, they create their memories movement in that they can add images, messages, tags, and titles other users are allowed to like posts and only creator of the post able to delete their post

STUDENT MANAGEMENTS SYSTEM DESKTOP- BASED APPLICATION | python tkinter,MYSQL

- I Build this application for storing student details.
